

Activities at Little Hearts Preschool Cranleigh

At Little Hearts Preschool Cranleigh, we are committed to providing a safe, engaging, and educational environment where children can explore, learn, and grow through carefully selected activities.

Our approach to activities encompasses a rigorous attention to safety and developmentally appropriate practices:

- Pre-Purchase Safety Checks:

Before any equipment or resources are introduced into our preschool, they are thoroughly evaluated to ensure they are safe and suitable for the ages and developmental stages of the children in our care. This ensures that all materials used at Little Hearts Preschool Cranleigh meet the highest safety standards.

- Thoughtful Layout Design:

The layout of our play areas is carefully designed to allow both adults and children to move safely and freely between activities. This not only prevents accidents but also promotes a dynamic and fluid learning environment where children can fully engage with their surroundings.

- Regular Equipment Inspections:

We conduct regular checks on all equipment to ensure it remains clean, safe, and in good working order. Any items that are found to be dangerous are promptly repaired or removed from the preschool. This ongoing vigilance helps maintain a secure environment for all children.

- Non-Toxic Materials:

We are committed to using only non-toxic materials, including paints, glues, and other crafting supplies. This precaution is taken to protect the health of the children and ensure that all creative activities are safe.

- Safe Play Sand:

The sand used in our play areas is specifically chosen for its cleanliness and suitability for children's play. Regular checks are conducted to ensure it remains free from contaminants and safe for use.

- Tool Handling and Safety Education:

Children at Little Hearts Preschool Cranleigh are taught to handle and store tools with care. This instruction is part of our broader commitment to fostering a sense of responsibility and awareness of safety among the children.

- Health, Safety, and Hygiene Education:

Through our activities and daily routines, children learn important lessons about health, safety, and personal hygiene. These lessons are seamlessly integrated into their play and learning experiences, helping them to develop good habits that will serve them well both within the preschool and beyond.

By integrating these safety measures into our activity planning, we ensure that children at Little Hearts Preschool Cranleigh can explore and learn in a secure and nurturing environment. Our approach reflects our dedication to providing a holistic education that prioritizes the well-being and development of every child.
